

APPCO WHITEPAPER

Whitepaper v1.1.0

INTRODUCTION

In 2006, if you told someone about the amazing things that could be done with mobile applications, they would have thought you were delusional. But thanks to technological advancements and brilliant minds, many of the applications we enjoy today were invented and

more applications are being churned out on a daily basis. These applications go on to generate billions of dollars in revenue yearly. In 2015, App Annie reported that the mobile application industry generates a whopping \$41 billion in revenue and this figure is expected to exceed \$190 billion by the end of 2020.

Appco is owned by a UK registered company that specialises in building projects which cut across technological and economic bounds. We invest in tech companies that develop mobile applications. Our process involves scouting for potential tech startups and funding them through their formative stage. When these companies become successful, we start reaping the benefits of that investment.

Why are we suddenly deciding to go public?

The answer to that question is quite simple.... **Growth!**

A study of successful companies all over the world would show that many of them realise their full potential after going public. While doing well as a private company, we wanted to innovate and expand globally, thereby opening our doors to the general public by offering

everyone a unique opportunity to invest in our vision.

Have you ever wished that you could invest in tech startups in their early stages? Have you ever wished to earn passive income from the comfort of your home? Have you ever wished you could earn from this thriving industry without even knowing the potential companies to invest in? If your answers to these questions are yes, then Appco is for you!

NO STORIES!

Start Earning with Appco

With just two unique investment plans, you can choose a short-term investment or choose to earn passive income for life with Appco.
